# ULTRA GH®

A higher fat, pelleted feed with added gastrointestinal support for performance horses.

PRODUCT CODE: T912GH

**Formulated with Tribute's TRIPLE THREAT Gut Health Approach:**

- With  microencapsulated active dry yeast; acts as both a **pre-and probiotic** to increase total diet digestibility and improve overall gut health.
- Specific **organic minerals** shown in controlled university studies to promote a healthy stomach lining.
- Direct-fed microbials** that are heat stable and support gastric integrity, especially during times of stress.
- High fat** and **highly digestible fiber** for calmer performances without loss of energy or condition.
- Provides the optimal balance of **amino acids** for muscle maintenance and recovery.
- Organic minerals** help to replenish body tissue stores depleted during normal daily activities and exercise.
- Provides fatty acids, **Omega 3 and 6**, for healthy skin, healthy hair coats, top performances, and quicker recovery.
- Optimum levels of **antioxidants** Vitamin E, Vitamin C and Selenium may help in reducing damage from aging and exercise. Also supports immune health.
- Added **B-Complex Vitamins** may improve appetite and blood cell counts.

\*A Phytase Unit (FTU) is defined as the quantity of enzyme which liberates one micromole of inorganic phosphate per minute from sodium phytate at 37°C, 5.5 pH.

This feed contains a source of live (viable), naturally-occurring microorganisms.

This feed contains a dry source of cellulase that breaks down cellulose, a dry source of protease that hydrolyzes proteins and increases the digestibility of protein in soybean meal-based diets, a dry source of lipase that hydrolyzes triglycerides, a dry source of hemicellulase that breaks down hemicellulose, and a dry source of phytase which hydrolyzes phytate and increases the digestibility of phytin-bound phosphorus.
