A high fat, lower NSC pellet with higher antioxidant fortification. For all classes of mature horses.

## PRODUCT CODE: T914R

- Higher levels of **Vitamin E** to support muscle-related conditions, such as tying-up. Also beneficial for the immune system.
- **Higher fat and highly digestible fiber** for calmer performances without loss of energy or condition.
- Optimal balance of essential **amino acids** for muscle maintenance and recovery.
- **Organic minerals** replenish body tissue stores depleted during daily activities and exercise.
- Essential fatty acids, **Omega 3 and 6**, for healthy skin and hair coat and support of normal tissue function.
- Excellent for **hard-keepers** and horses requiring **less NSC** in their diets, like those who are hyperactive or have conditions such as ulcers or tying-up.
- With , a microencapsulated active dry yeast; acts as both a **pre-and probiotic** to increase total diet digestibility and improve overall gut health.

\*An Enzyme Unit is defined as milligrams of substrate liberated/minute/lb. of feed

\*A Phytase Unit (FTU) is defined as the quantity of enzyme which liberates one micromole of inorganic phosphate per minute from sodium phytate at 37°C, 5.5 pH

This feed contains a dry source of cellulase that breaks down cellulose, a dry source of protease that hydrolyzes proteins and increases the digestibility of protein in soybean meal based diets, a dry source of lipase that hydrolyzes triglycerides, a dry source of hemicellulase that breaks down hemicellulose, and a dry source of phytase which hydrolyzes phytate and increases the digestibility of phytin-bound phosphorus.
